The purpose of the Report Card rating details report is to describe the rating methodology and display the data used by the school accountability system to determine the overall school rating (i.e., overall level) that is shown on each school's Report Card. For more details on the school report cards, please visit the following link:
<http://www.ode.state.or.us/go/schoolRC>.

Given the recent passage of the Every Student Succeeds Act (ESSA) and the expiration of Oregon's ESEA flexibility waiver on August 1, 2016, the State of Oregon will not assign overall school ratings for the 2015-16 school year.

Levels are calculated using the percentage of points earned out of the total points eligible. For schools with data on all indicators, the total points possible are:

- 25 for Academic Achievement
- 50 for Academic Growth
- 25 for Student Group Growth

The total score is matched to the scoring guide above to determine the school's rating.

The Academic Achievement indicator reflects the percent of all students that meet or exceed standards on the state English language arts and mathematics assessments at all tested grades in the school. Both English language arts and mathematics have an annual measurable target, and each student group will meet the target if the value for "% of students at Level 3 or Level 4" is greater than or equal to the target.

The Academic Growth indicator uses the Colorado Growth Model to measure student growth in English language arts and mathematics as compared to academic peers (i.e., students throughout the state who have a similar English language arts or mathematics test score history).

Oregon adopted this growth model as part of the process of obtaining a waiver from some of the requirements of the No Child Left Behind Act (NCLB). This growth model provides a more complete picture of student performance and will help provide a better evaluation of school effectiveness.

The growth model examines a student's current performance as compared to that of his/her academic peers with a similar test score history, and expresses it as a percentile (i.e., a ranking from 1 to 99 where 99 is the highest). For example, a growth percentile of 50 in English language arts would indicate that a student had typical or average growth compared to all other students in the state with similar prior test scores. A growth percentile of 80 would indicate that a student's growth was as high or higher than 80 percent of his/her academic peers.

The school accountability system uses the median growth percentile for both English language arts and mathematics to represent the "typical" growth at the school. For example, a median growth percentile of 65 in mathematics would indicate that the typical student in this school exhibited growth in mathematics as high or higher than 65 percent of his/her academic peers. As shown below, this median growth percentile is the basis for the Academic Growth ratings for English language arts and mathematics.

Growth Level Cutoffs	
Level	Median Growth Percentile

Level 3	40 to 49.5

Data notes:

Not Rated Refers to a student group that did not meet minimum size requirements in order to receive a rating.

* Fewer than 6 students with growth percentiles.

The Student Group Growth indicator measures the growth of historically underserved student groups. It disaggregates the Academic Growth indicator and reflects the growth for economically disadvantaged, English learners, students with disabilities, and historically underserved races/ethnicities. The school accountability system uses the median growth percentile for both English language arts and mathematics to represent the “typical” growth for each student group.

Level 5	65 & above
Level 4	50 to 64.5
Level 3	40 to 49.5
Level 2	35 to 39.5
Level 1	Less than 35

To receive a Student Group Growth indicator rating, a student group must meet the minimum size requirement for the Academic Achievement indicator rating (i.e., 40 tests in the last two years combined) and at least 30 students with growth percentiles.

All students in tested grades and enrolled on the first school day in May must take a statewide assessment. The tables below display the percentage of students who took a statewide assessment by school year, subject, and student group. The tables also indicate whether each student group met the federal participation rate target of 94.5%.

The Academic Achievement, Academic Growth, and Student Group Growth indicators depend upon student test scores. These indicators are valid only when schools uniformly test all students.

Note that non-participants include the following: students whose parents/guardians opted them out from taking the statewide English language arts or mathematics assessments, students who were absent for an extended period of time, students whose parents/guardians requested they not participate for religious or disability related reasons, or students who did not participate due to unknown circumstances.
